Study of gas diffusion in a porous medium

Lugovtsov Gleb

Table of contents

1. Steps and plans
2. Our purposes
3. Theory and exegesis
4. Data analysis
5. Discussion, overview
6. Suggestions for improving experiment
7. Conclusion

Scheme of the experimental plant

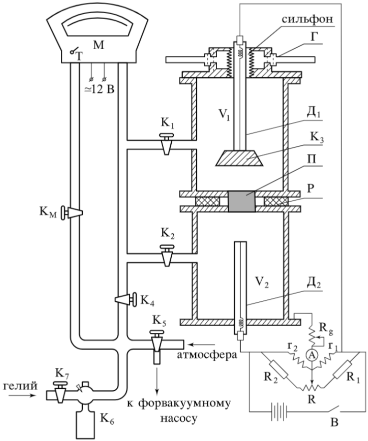

Figure: Scheme of the experimental plant

Description of the experimental plant

1. Plant is made of metal and consists of two vessels connected to each other with duct. Duct contains porous medium and sealed with rubber seal.

Description of the experimental plant

1. Plant is made of metal and consists of two vessels connected to each other with duct. Duct contains porous medium and sealed with rubber seal.
2. Plant characteristics:
   2.1 $V_1 = 220 \pm 20 cm^3, V_2 = 220 \pm 20 cm^3$ – volume of vessels.
   2.2 $L = 11.0 \pm 0.1 mm, d = 9.5 \pm 0.1 mm$ – info of duct.
